

**One-Stop
Service Solution**

Mold Manufacturing • Zinc Alloy Die Casting • Plastic Injection

**Best Choice of Manufacturing Service Partner
In Precise Components**

SHIUH SHING
— SINCE 1974 —

About SHIUH-SHING

SHIUH-SHING ACCURATE FACTORY CO., LTD established in Taiwan in 1974, as a service-oriented company specializes in mold design and development, precise small component manufacturing in zinc alloy die-casting and plastic injection.

While zinc alloy die casting and plastic injection can be utilized in a wide range of industrial applications, we have been serving our clients worldwide from different industries with high variety of the customized components. With an extensive array of direct OEM service experience and solid professional competencies for more than 40 years as our competitive advantages, SHIUH SHING equipped with in-house engineering and operation teams, production facilities and equipment, is strongly capable of providing the one-stop made-to-order precision service that aims at bringing our clients the satisfying customer experience journey.

Being ISO 9001 certified, SHIUH SHING has been committing to timely supply and quality assurance during the end-to-end service process in order to meet the best service level agreed. We firmly believe by maintaining high degree of quality stability, our clients could have peace of mind while outsourcing manufacturing services to SHIUH SHING.

By doing so, not only we could cultivate and maintain long-term business relationship of reliability with our clients, but also achieve the objective of corporate sustainability which we regard seriously as a motivation and a responsibility to improve from all business aspects.

Integrating Value-Added Contract Manufacturing Services

Through the solid hand-on experience and contract manufacturing capabilities, SHIUH SHING has been accumulating profound knowledge of the characteristics of raw materials, and the functionality of relevant manufacturing and processing machinery, which enables us to provide the most effective service solution that meets client requirements and objectives.

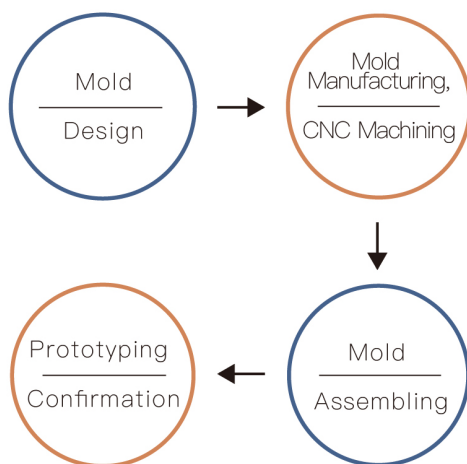

- Mold design and development
- Precise zinc alloy die casting
- Precise plastic injection

**Quality Stability
Subject Matter Expert
Customer Satisfaction**

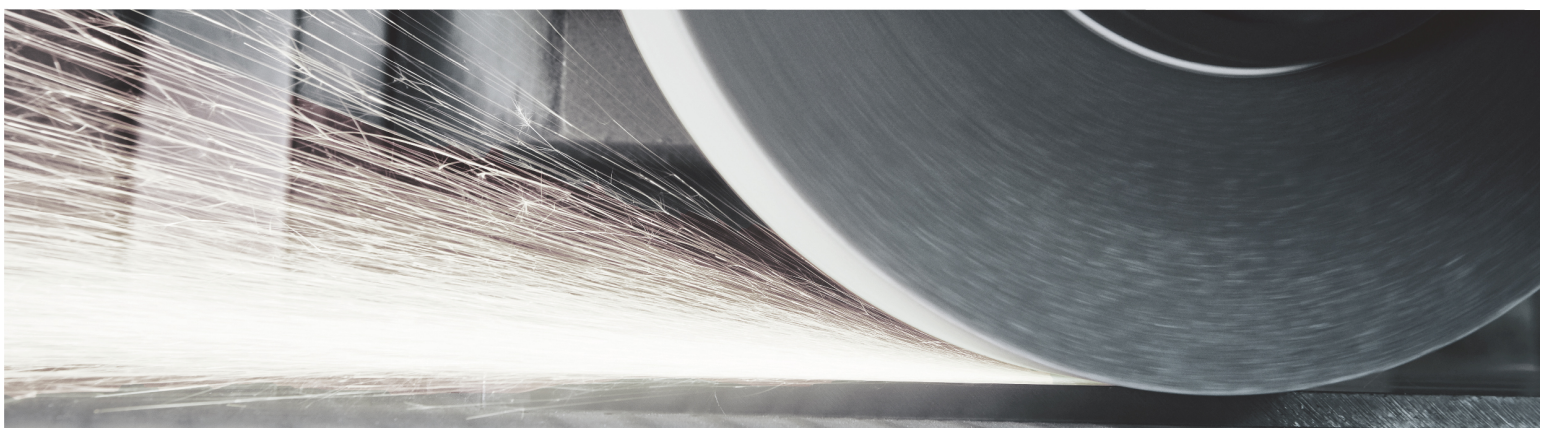

Mold Design and Development Service

With more than 40 years of intensive experience in mold manufacturing and processing, the molds are developed to use mainly in producing the customized components for our clients. This brings the one-stop service delivery to our clients, enabling them to optimize the supply chain efficiency by reducing time and efforts in managing multiple suppliers.

Since the initial stage of mold design, we cooperate with our back-end operation teams by taking into consideration the multi-faceted aspects including product design, engineering principles, raw material characteristics, machining and production processes.

A good mold design certainly facilitates the subsequent work processes, improves operational efficiency and minimizes the contingency of issues occurred during mold trials or mass production.

Precision Service – Zinc Alloy Die Casting

Hot Chamber Die Casting

SHIUH SHING specializes in providing the precise zinc alloy die casting components with unit weight of 0.15g above, as small as 0.3cm in width, less than 1cm in length. The accuracy of our precise zinc alloy die-casting products has achieved a tolerance of 0.01mm as well.

In addition, we are confident to meet the high technical standards and quality examinations, including thread ring gauge, torque test, strength test and destructive test. To produce the most precise component it could be, it requires not only the state-of-art production machinery, measurement and testing equipments, but also intensively relies on the technical capabilities and experiences.

Zinc alloy is an ideal alternative to certain industrial component materials due to its distinct material characteristics, for instance, low melting point, good fluidity, high strength and hardness, high dimensional precision and stability, ability to further processing, good thin wall capability and suitability for high-volume mass production.

Product Category Of Our OEM Zinc Alloy Die Casting

- Cable & Connector Barrel
- Lock Parts
- Bushing for Variable Resistor / Rotary Potentiometer
- Inflating Needle
- Shaft for Toggle Switch and Turning Button
- Machinery Parts
- Camera Accessories Parts
- Dial Lock Parts
- TV Signal Distribution Splitter
- Fasteners – Nuts, Bolts, Washers and Screws
- Micro Small and Precise Components
- Quartz Clock Movement Parts
- Other Made-to-Order Items

Industry Served With Our Zinc Alloy Die Casting Service

- Electronics Manufacturing
- Consumer Electronics Manufacturing
- Information and Communications
- Bicycle Peripheral Manufacturing
- Machinery / Machine Parts Manufacturing
- Music Instrument Manufacturing
- Lock Manufacturing
- Clock Manufacturing
- Sporting Goods Manufacturing

Precision Service - Plastic Injection

SHIUH SHING has been operating business for more than 40 years specializing in precise plastic injection and focusing on the small plastic components with unit weight of 0.06g~0.1g. The main features of our precise plastic parts are **light**, **thin**, **short** and **small**. SHIUH SHING emphasizes not only on the tolerance stability of the product, but also on the quality stability during the end-to-end production process.

As the plastic injection can be utilized in a wide range of industrial applications, the relevant engineering plastics selection, such as PBT, POM, and NYLON 66, can be considered according to product attributes designed. Through closely communicating with clients to ensure the comprehension of client requirements collected, we can precisely and effectively produce the finished goods that perfectly meet client specifications and standards.

With our strong technical capabilities and direct experiences, you could have confidence in SHIUH SHING as your trusted contract manufacturing service provider.

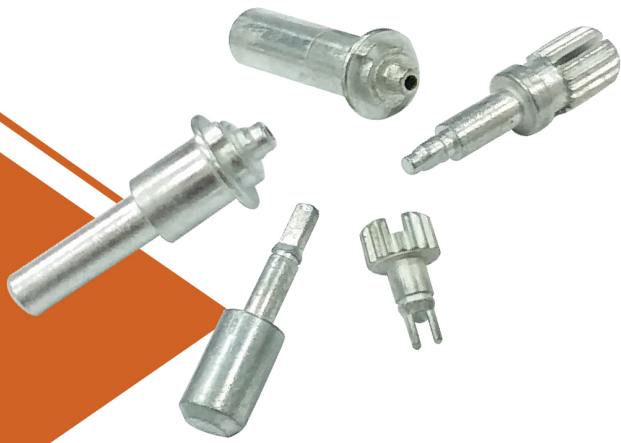

Product Category Of Our OEM Plastic Injection

- Pressure Air Nozzle
- Barometer Pointer
- Electronics Part Base
- Shift Controller / Lever Parts
- Other Electronics Parts
- Other Customized Items

Industry Served With Our Plastic Injection Service

- Electronics Manufacturing
- Machinery and Equipment Manufacturing

Mission Statement

SHIUH SHING ACCURATE FACTORY CO., LTD conducting business with the ethical principles provides top quality in products and services, enhances customer and employee satisfaction, undertakes the continuous improvement and strives for excellence in order to maintain long-term service partnership with our clients, as well as to achieve corporate objective of sustainability.

From Molding to Precision Manufacturing Your One-Stop Manufacturing Service Partner

While working with SHIUH SHING, our clients are not only experiencing our high quality stability, but also our constant monitoring on the status of ongoing projects and order processing. They are able to perceive our proactive and professional working attitude, service-oriented mindset to communicate and to resolve challenges. The fact SHIUH SHING can stand firm in the industry for more than 40 years is we believe with integrity and professionalism to serve our clients, both parties can grow together and achieve win-win business benefits.

Quality Assurance

Starting from ISO 9001:1994 to ISO 9001:2015/CNS 12681 certified in 2017, SHIUH SHING has been continuously deploying the standard operating procedure through the end-to-end manufacturing process. We commit to quality assurance at each work station within the process in order to meet the best service level agreement.

We firmly believe that only by successfully maintaining a high degree of quality stability, we can cultivate and maintain a long-term business relationship of reliability with our clients.
